Hiring Manager
Funnel
1115 Gunn Hwy Suite 201
Odessa, FL 33556

Dear Hiring Manager,

I am applying for the **TEST** role at Funnel. I bring full-stack software development experience along with hands-on DevOps work supporting CI/CD, cloud deployments, and production systems. I am especially interested in contributing to to create the future rental experience and make the world a better place.

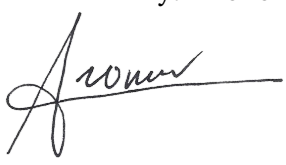

At JPMorgan Chase, I developed React and TypeScript front-end components and Java/Spring Boot microservices, deployed services to Kubernetes, and built an administrative tool that streamlined file management. I also provided Level 3 production support, diagnosing and resolving critical issues.

In my current role at Collins Aerospace, I develop and test software for mission-critical aerospace and defense applications. I write software requirements, build Python UI applications with Qt Designer for distinct customer use cases, and lead a DevOps team maintaining CI/CD pipelines and build workflows for applications written in multiple languages. I also manage CloudStack instances and images in an air-gapped network. My experience with AWS, CI/CD, and Kubernetessupports the reliability and delivery needs of this role.

I would welcome the opportunity to discuss how my full-stack and DevOps experience could contribute to Funnel. Thank you for your consideration.

I hold an active DoD Top Secret (TS) clearance and bring experience developing software in secure, mission-critical environments.

Sincerely,
Ilya Aronov

Full Stack Developer
