Full Stack Software Developer | DoD Top Secret (TS) Clearance

Summary

Full Stack Software Developer experienced delivering customer-focused applications, backend services, and automation across aerospace and defense, financial services, and telecommunications. Develops React and TypeScript interfaces, Java/Spring Boot services, and Python UI applications. Skilled in requirements analysis, system integration and testing, and CI/CD delivery for applications built with multiple languages. Holds an active DoD Top Secret clearance and has worked in SCIF and air-gapped environments.

Experience

- **Collins Aerospace** — Largo, FL
  Software Engineer — *June 2024 - Present*
  - **Requirements and Lifecycle Delivery**: Authored and refined software requirements, then developed, integrated, tested, and maintained real-time software for mission-critical aerospace and defense systems.
  - **Customer-Focused Applications**: Developed multiple Python UI applications in parallel with Qt Designer, translating distinct customer use cases into tailored tools. Partnered with software and systems engineers to troubleshoot integration issues, test with hardware and simulators, debug defects, and verify fixes.
  - **Secure Environments and Infrastructure**: Performed development in a Sensitive Compartmented Information Facility (SCIF) and managed Apache CloudStack instances and images in an air-gapped network, following applicable security procedures.
  - **DevOps and Integration**: Led DevOps work maintaining CI/CD pipelines and build workflows for applications written in multiple languages. Contributed to Agile delivery, code reviews, and Git-based version control across new and legacy programs.
- **JPMorgan Chase** — Tampa, FL
  Full Stack Developer — *March 2022 - March 2024*
  - **Full-Stack Development**: Developed React and TypeScript front-end components and Java/Spring Boot microservices using test-driven development. Deployed services to Kubernetes and created an administrative WYSIWYG tool to streamline file management. Reviewed pull requests and provided Level 3 production support, diagnosing and resolving critical issues.
- **Infosys (Verizon)** — Tampa, FL
  System Engineer — *January 2017 - February 2022*
  - **Software and Automation**: Developed microservices-based tools, modules, and frameworks for AWS and OCI environments. Wrote SQL queries, stored procedures, and functions, and maintained Jenkins CI/CD frameworks. Automated recurring reports and developed a Slack chatbot for team coordination, ticket handling, and reporting.
  - **Operations and Improvement**: Implemented automation, monitoring, and logging improvements; troubleshot Jenkins delivery builds; and contributed to hiring.
- **Verizon** — Tampa, FL
  System Engineer — *June 2014 - January 2017*
  - **Production Support**: Supported monthly production billing processes in line with SLAs. Facilitated Scrum issue-tracking meetings and diagnosed billing problems to minimize disruption and maintain accuracy.
- **Coastal Carolina University** — Conway, SC
  Teaching Assistant / Tutor — *September 2012 - December 2014*
  - **Programming Tutoring**: Tutored students in Java and C/C++, providing one-on-one help with course concepts, assignments, and debugging.

Skills

- **Programming Languages & Frameworks**: Java, Spring Boot, JPA/Hibernate, JavaScript, TypeScript, React, JSX, Redux, Python, Qt Designer, Node.js, npm, Express, Bash scripting, MVC, C/C++
- **Web Development**: HTML5, CSS3, TailwindCSS, UI Toolkit Libraries, JSX
- **Database Technologies**: RDBMS, SQL Server, MySQL, Oracle SQL, PostgreSQL, GraphQL, NoSQL, Cassandra
- **Cloud Services & Deployment**: AWS, EC2, RDS, Docker, Kubernetes, Apache CloudStack, Jenkins, CI/CD
- **Version Control & Collaboration**: Git, SSH, VPN, Jira, Confluence, Agile, Scrum
- **Testing & Quality Assurance**: JUnit, Jest, Test-Driven Development
- **APIs & Communication Protocols**: SOAP, RESTful APIs, JSON, Postman
- **Monitoring & Logging**: Splunk
- **Software Development**: Object-Oriented Design, MVC, SOLID, requirements analysis, software development lifecycle, TDD, CI/CD, Agile, Scrum

Education

- **Coastal Carolina University** — Conway, SC
  Bachelor of Science in Information Systems — *May 2014*
  Minor in Computer Science — *GPA 3.5 Dean's List*
